

What is claimed is:

1. A computer-readable storage medium comprising:
operational instructions that, when executed by a
5 processor, cause the processor to receive a first
selection generated by a user pressing a first button
of a plurality of buttons of a keyboard, the first
selection corresponding to a first portion of web
information;
10 operational instructions that, when executed by
the processor, cause the processor to display the first
portion of the web information that corresponds to the
first selection;
operational instructions that, when executed by
15 the processor, cause the processor to receive a second
selection generated by the user pressing a second
button of the plurality of buttons of the keyboard, the
second selection corresponding to a second portion of
the web information; and
20 operational instructions that, when executed by
the processor, cause the processor to display the
second portion of the web information that corresponds
to the second selection.
- 25 2. The computer-readable storage medium of Claim 1,
wherein the plurality of buttons of the keyboard are
arranged in a row.

3. The computer-readable storage medium of Claim 1 further comprising:

operational instructions that, when executed by
5 the processor, cause the processor to, before the first and second selections are received:

associate the first button with the first
portion of the web information; and

associate the second button with the second
10 portion of the web information.

4. The computer-readable storage medium of Claim 3, wherein the first button is associated with the first portion of the web information to the exclusion of
15 other web information, and wherein the second button is associated with the second portion of the web information to the exclusion of other web information.

5. The computer-readable storage medium of Claim 1,
20 wherein when the first portion of the web information is displayed, it is displayed in a display window irrespective of a relationship between the first portion of the web information and whatever portion of the web information is displayed in the display window
25 when the first selection is received.

6. The computer-readable storage medium of Claim 5,

wherein when the second portion of the web information is displayed, it is displayed in the display window irrespective of a relationship between the second portion of the web information and whatever portion of the web information is displayed in the display window when the second selection is received.

7. The computer-readable storage medium of Claim 1, wherein the computer-readable storage medium includes at least one of RAM and a mass storage device.

8. The computer-readable storage medium of Claim 1, wherein the first and second portions of the web information are displayed on a display device.

9. A system comprising:
a keyboard that includes a plurality of buttons;
and
a computer-readable storage medium comprising:
operational instructions that, when executed by a processor, cause the processor to receive a first selection generated by a user pressing a first button of the plurality of buttons of the keyboard, the first selection corresponding to a first portion of web information;
operational instructions that, when executed by the processor, cause the processor to display

the first portion of the web information that corresponds to the first selection;

operational instructions that, when executed by the processor, cause the processor to receive a
5 second selection generated by the user pressing a second button of the plurality of buttons of the keyboard, the second selection corresponding to a second portion of the web information; and

operational instructions that, when executed
10 by the processor, cause the processor to display the second portion of the web information that corresponds to the second selection.

10. The system of Claim 9, wherein the plurality of
15 buttons of the keyboard are arranged in a row.

11. The system of Claim 9, wherein the computer-readable storage medium further comprises:

operational instructions that, when executed by
20 the processor, cause the processor to, before the first and second selections are received:

associate the first button with the first portion of the web information; and

associate the second button with the second
25 portion of the web information.

12. The system of Claim 11, wherein the first button

is associated with the first portion of the web information to the exclusion of other web information, and wherein the second button is associated with the second portion of the web information to the exclusion
5 of other web information.

13. The system of Claim 9, wherein when the first portion of the web information is displayed, it is displayed in a display window irrespective of a
10 relationship between the first portion of the web information and whatever portion of the web information is displayed in the display window when the first selection is received.

14. The system of Claim 13, wherein when the second portion of the web information is displayed, it is displayed in the display window irrespective of a relationship between the second portion of the web information and whatever portion of the web information
15 is displayed in the display window when the second selection is received.

15. The system of Claim 9, wherein the computer-readable storage medium includes at least one of RAM
25 and a mass storage device.

16. The system of Claim 9, wherein the first and

- 31 -

second portions of the web information are displayed on a display device.

- 31 -
